## **Overview**

### **Magento Supported Versions**

This module is compatible with Magento versions 2.2.11, 2.3.5, 2.3.5-p1.

Compatibility with other versions of the Magento 2.2.x and 2.3.x series had no be confirmed

### **Supported Payment Methods**

The module is intended to work with any payment method that uses the Magento default checkout process workflow.

Supported payment methods (\*):

- Cash on delivery
- Check/Money Order
- PayPal Express Checkout
- PayPal Payments Advanced
- PayPal Payments Pro
- PayPal Payments standard
- Amazon Pay

(\*) Any payment method not listed here must work if it doesn't modify the Magento default checkout workflow.

## **Install**

### **Install via composer**

1. Connect to your server via SSH
2. Update your composer.json file. Add the repositories.

For code access via SSH (\*):

```
"repositories": [  
  {  
    "type": "composer",  
    "url": "https://repo.magento.com/"  
  },  
  {  
    "type": "git",  
    "url": "git@github.com:myzillion/Zillion-Magento-Extension.git"  
  },  
  {  
    "type": "git",  
    "url":  
      "git@github.com:myzillion/zillion-insurance-api-wrapper-php.git"  
    }  
],
```

For access via user/password:

```
"repositories": [  
  {  
    "type": "composer",  
    "url": "https://repo.magento.com/"  
  },  
  {  
    "type": "git",  
    "url": "https://github.com/myzillion/Zillion-Magento-Extension.git"  
  },  
  {  
    "type": "git",  
    "url":  
      "https://github.com/myzillion/zillion-insurance-api-wrapper-php.git"  
    }  
],
```

3. Require module:

```
$ composer require myzillion/module-simplified-insurance
```

4. Enable module:

```
$ bin/magento module:enable MyZillion_SimplifiedInsurance
```

```
$ bin/magento module:status MyZillion_SimplifiedInsurance
```

#### 5. Deploy Magento:

```
$ bin/magento setup:upgrade  
$ bin/magento setup:di:compile  
$ bin/magento setup:static-content:deploy  
$ bin/magento cache:flush
```

(\*) How to add an SSH deploy key: <https://docs.github.com/v3/guides/managing-deploy-keys/>

(\*) How to generate an SSH key: <https://docs.github.com/articles/generating-an-ssh-key>

### Install via zip file

1. Connect to your server via ssh
2. Go to <root folder>/app/code
3. Uncompress provided file MyZillion\_SimplifiedInsurance.zip. The folder structure must be:
  - Module: <root folder>/app/code/MyZillion/SimplifiedInsurance
  - PHP Wrapper: <root folder>/app/code/MyZillion/InsuranceApi
4. Deploy Magento:

```
$ bin/magento setup:upgrade  
$ bin/magento setup:di:compile  
$ bin/magento setup:static-content:deploy  
$ bin/magento cache:flush
```

#### 5. Ensure the module is enabled:

```
$ bin/magento module:status MyZillion_SimplifiedInsurance
```

#### 6. If not, enable the module and deploy:

```
$ bin/magento module:enable MyZillion_SimplifiedInsurance  
$ bin/magento setup:upgrade  
$ bin/magento setup:di:compile  
$ bin/magento setup:static-content:deploy  
$ bin/magento cache:flush
```

### Magento entities updated

The MyZillion Simplified Insurance module updates the quote and sales\_order entities adding new fields in their structure.

- Quote
  - customer\_request\_insurance: It is used to identify if the client accepted or rejected the insurance offer in the checkout process.
  - offer\_response: Contains the offer endpoint response from the API request.
- Order
  - customer\_request\_insurance: This is used to identify if the order has the offer approved or rejected by the customer.
  - order\_post\_response: Save response information for each Order Post request sent to the API.

## **Disable module**

In order to disable the module via Magento cli, run:

```
$ bin/magento module:disable MyZillion_SimplifiedInsurance
```

## **Uninstall module**

To uninstall the module permanently please follow the next steps:

1. Uninstall module. This will remove all of the Zillion data existing in the database..

```
$ bin/magento module:uninstall MyZillion_SimplifiedInsurance
```

2. Remove the code

- a. Installed via composer. Execute:

```
$ composer remove myzillion/module-simplified-insurance
```

- b. Installed via Zip. Remove the <root folder>/app/code/MyZillion/ folder

3. Deploy Magento:

```
$ bin/magento setup:upgrade  
$ bin/magento setup:di:compile  
$ bin/magento setup:static-content:deploy  
$ bin/magento cache:flush
```
